**DIRECTIONS** ADMINISTER 0.5ML IN THE MUSCLE  
AS DIRECTED TODAY

**DOCTOR**

**DRUG DESCRIPTION**

**PATIENT  
ALLERGIES**

LIQUID

**GENERIC INGREDIENT:** Influenza Virus Vaccine  
(Inactivated)(In flou EN za VYE rus vak SEEN, in ak ti  
VAY ted)

**BRAND NAMES:** Afluria Quadrivalent; Flud  
Quadrivalent; Flud (IDSC); Fluorix Quadrivalent; Flucelvac  
Quadrivalent; Flulaval Quadrivalent; Fluzone High-Dose  
Quadrivalent; Fluzone Quadrivalent

**COMMON USES:** It is used to prevent the flu.

**BEFORE USING THIS MEDICINE:** WHAT DO I NEED TO  
TELL MY DOCTOR BEFORE I TAKE THIS DRUG? TELL YOUR  
DOCTOR: If you are allergic to this drug; any part of this  
drug; or any other drugs, foods, or substances. Tell your  
doctor about the allergy and what signs you had. This drug may  
interact with other drugs or health problems. Tell your doctor  
and pharmacist about all of your drugs (prescription or OTC,  
natural products, vitamins) and health problems. You must  
check to make sure that it is safe for you to take this drug  
with all of your drugs and health problems. Do not start,  
stop, or change the dose of any drug without checking with  
your doctor.

**HOW TO USE THIS MEDICINE:** HOW IS THIS DRUG BEST  
TAKEN? Use this drug as ordered by your doctor. Read all  
information given to you. Follow all instructions closely. It  
is given as a shot into a muscle. HOW DO I STORE AND/OR  
THROW OUT THIS DRUG? If you need to store this drug at  
home, talk with your doctor, nurse, or pharmacist about how  
to store it. WHAT DO I DO IF I MISS A DOSE? Call your  
doctor to find out what to do.

**CAUTIONS:** Tell all of your health care providers that you  
take this drug. This includes your doctors, nurses,  
pharmacists, and dentists. If you have a latex allergy, talk  
with your doctor. If you are allergic to eggs, talk with the  
doctor. Like all vaccines, this vaccine may not fully protect  
all people who get it. If you have questions, talk with the  
doctor. This drug is a vaccine with a virus that is not  
active. It cannot cause the disease. This drug is not a cure  
for the flu. It must be given before you are exposed to the  
flu in order to work. Most of the time, it takes a few weeks  
for this drug to work. This drug only protects you for 1 flu  
season. You will need to get the flu vaccine each year. If you  
have a weak immune system or take drugs that weaken the  
immune system, talk with your doctor. This vaccine may not  
work as well. Not all brands of vaccines are for all children.  
Talk with your child's doctor. Some children may need to have  
more than 1 dose of this vaccine. Talk with your child's  
doctor. Some children have had a fever and seizures caused by  
fevers with some flu vaccines. Most of the time, this  
happened in children younger than 5 years of age. Fever has  
also been seen in children 5 to younger than 9 years of age.  
Talk with your child's doctor. Tell your doctor if you are  
pregnant, plan on getting pregnant, or are breast-feeding.  
You will need to talk about the benefits and risks to you and  
the baby.

**POSSIBLE SIDE EFFECTS:** WHAT ARE SOME SIDE  
EFFECTS THAT I NEED TO CALL MY DOCTOR ABOUT  
RIGHT AWAY? WARNING/CAUTION: Even though it may be  
rare, some people may have very bad and sometimes deadly side  
effects when taking a drug. Tell your doctor or get medical

help right away if you have any of the following signs or  
symptoms that may be related to a very bad side effect: Signs  
of an allergic reaction, like rash; hives; itching; red,  
swollen, blistered, or peeling skin with or without fever;  
wheezing; tightness in the chest or throat; trouble  
breathing; swallowing, or talking; unusual hoarseness; or  
swelling of the mouth, face, lips, tongue, or throat. A  
burning, numbness, or tingling feeling that is not normal. Not  
able to move face muscles as much. Trouble controlling body  
movements. Very bad dizziness or passing out. Muscle weakness.  
Seizures. Change in eyesight. WHAT ARE SOME OTHER SIDE  
EFFECTS OF THIS DRUG? All drugs may cause side effects.  
However, many people have no side effects or only have minor  
side effects. Call your doctor or get medical help if any of  
these side effects or any other side effects bother you or do  
not go away. For all patients taking this drug: Pain, redness,  
swelling, or other reaction where the injection was  
given. Headache. Muscle or joint pain. Feeling tired or  
weak. Chills. Young children: Mild fever. Upset stomach or  
throwing up. Stomach pain or diarrhea. Decreased  
appetite. Feeling sleepy. Feeling fussy. Crying that is not  
normal. These are not all of the side effects that may occur.  
If you have questions about side effects, call your doctor.  
Call your doctor for medical advice about side effects. Report  
side effects to the FDA/CDC Vaccine Adverse Event  
Reporting System (VAERS) at [https://  
vaers.hhs.gov/reportevent.html](https://vaers.hhs.gov/reportevent.html) or by calling 1-800-  
822-7967.

**GENERAL DRUG FACTS:** If your symptoms or health problems  
do not get better or if they become worse, call your  
doctor. Do not share your drugs with others and do not take  
anyone else's drugs. Keep all drugs in a safe place. Keep all  
drugs out of the reach of children and pets. Throw away unused  
or expired drugs. Do not flush down a toilet or pour down a  
drain unless you are told to do so. Check with your  
pharmacist if you have questions about the best way to throw  
out drugs. There may be drug take-back programs in your  
area. Some drugs may have another patient information leaflet.  
Check with your pharmacist. If you have any questions about  
this drug, please talk with your doctor, nurse, pharmacist,  
or other health care provider. If you think there has been an  
overdose, call your poison control center or get medical care  
right away. Be ready to tell or show what was taken, how  
much, and when it happened.

Keep out of reach of children: Store in safety container or secure area.
